

Wondfo USA Launches SAFElife™ Multi-Panel Rapid Hair Test with Mobile Hair Processor for Employment and Insurance Testing

Enabling rapid screening for drugs in hair specimens

Wondfo USA Co., Ltd. (Wondfo USA), a wholly owned subsidiary of Wondfo Biotech, is pleased to announce the launch of its SAFElife™ Multi-Panel Rapid Hair Test with Mobile Hair Processor for Employment and Insurance (E&I) testing.

The SAFElife™ Multi-Panel Rapid Hair Test is designed for use in the general workplace and in insurance testing environments and can qualitatively detect and differentiate between drugs present in hair samples including amphetamines, benzodiazepines, benzoyllecgonine, cocaine, fentanyl, MDMA, methamphetamine, opiates, oxycodone and PCP.

Hair testing has become increasingly important in environments where it is importance to understand lifestyle choices or drug use patterns. Traditionally hair testing was performed in a laboratory with days between sampling to results, causing delays in hiring or other employment decisions but, with the launch of rapid hair testing results are available minutes after testing.

The SAFElife™ Mobile Hair Processor and Multi-Panel Rapid Hair Test are the latest innovations from Wondfo, delivered with the same standards of quality and accuracy expected from all Wondfo products.

"The E&I launch of our SAFElife™ Multi-Panel Rapid Hair Test marks a significant milestone for Wondfo USA. This achievement is the next step in our mission to revolutionize rapid testing. With answers now available minutes from testing we are empowering employers and insurance testing professionals to make decisions with more confidence and accuracy."

Brian Drake – VP of Sales and Downstream Marketing at Wondfo USA

About Wondfo USA Co., Ltd.

Wondfo USA Co., Ltd. is a high-tech enterprise focusing on the research, development, production, sales, and service of point-of-care testing (POCT) products. Wondfo USA distributes rapid products in four major categories including Toxicology Testing, Infectious Disease, Women's Reproductive Health, and Veterinary Diagnostics. Wondfo's diagnostic products are sold in more than 140 countries and regions, and are widely used in various settings, including clinical testing, critical care medicine, primary care, epidemic monitoring, disaster rescue, on-site law enforcement, and family health management. With a strong commitment to innovation and quality, Wondfo aims to make significant contributions to the global healthcare industry. Wondfo USA has established a manufacturing facility in San Diego, CA and a dedicated distribution center in Bolingbrook, IL to enhance its ability to supply kits to the US market, ensuring a reliable supply of tests to meet the country's needs.
