

Wondfo Canada Launches SAFElife™ Multi-Panel Rapid Hair Test

Canada's FIRST rapid hair test, enabling rapid, on-site screening for drugs in hair specimens.

Wondfo Canada, a wholly owned subsidiary of Wondfo Biotech, is pleased to announce the launch of its SAFElife™ Multi-Panel Rapid Hair Test following Health Canada granting Authorization for distribution of the product. The test is used with the SAFElife™ Hair Processor in workplace, criminal justice and clinical settings.

The SAFElife™ Multi-Panel Rapid Hair Test can qualitatively detect and differentiate between drugs present in hair samples including 6-monoacetylmorphine, amphetamines, barbiturates, benzodiazepines, benzoyllecgonine, cocaine, fentanyl, MDMA, methamphetamine, methadone, opiates, oxycodone, PCP and THC.

Hair testing has become increasingly important in environments where it is important to understand lifestyle choices or drug use patterns. Traditionally hair testing was performed in a laboratory with days between sampling to results, causing delays in hiring or other employment decisions but, with rapid hair testing results are available minutes after testing.

The SAFElife™ Hair Processor and Multi-Panel Rapid Hair Test are recent innovations from Wondfo, already in regular use in the United States, and delivered with the same standards of quality and accuracy expected from all Wondfo products.

"The Canadian launch of our SAFElife™ Multi-Panel Rapid Hair Test demonstrates Wondfo's continued commitment to provide innovative rapid testing solutions. We are empowering employers' criminal justice and clinical professionals to make timely decisions with more confidence and accuracy."

Brian Drake – VP and GM, Channel Partner Business Unit at Wondfo

About Wondfo

Wondfo is a high-tech enterprise focusing on the research, development, production, sales, and service of point-of-care testing (POCT) products. Wondfo distributes rapid products in four major categories including Toxicology Testing, Infectious Disease, Women's Reproductive Health, and Veterinary Diagnostics. Wondfo's diagnostic products are sold in more than 140 countries and regions, and are widely used in various settings, including clinical testing, critical care medicine, primary care, epidemic monitoring, disaster rescue, on-site law enforcement, and family health management. With a strong commitment to innovation and quality, Wondfo aims to make significant contributions to the global healthcare industry. Wondfo has established a manufacturing facility in San Diego, California and a dedicated distribution center in Bolingbrook, IL to enhance its ability to supply kits to the US and Canadian markets, ensuring a reliable supply of tests to meet the North American needs.
